Outside that area the difference in basic wage is to be added. There are also District Allowances for certain localities.

XV.—METEOROLOGICAL STATISTICS.

(Supplied by the Commonwealth Meteorologist, Mr. W. S. Watt.)

WEATHER NOTES.

No. 41.—Notes on the Rainfall and general weather conditions in Western Australia during the months of April, May, and June, 1939.

April.—Following upon an exceptionally dry March, the rainfall in Western Australia in April was again substantially below normal over the greater portion of the State.

Some of the pastoral areas of the sub-tropics fared moderately well, the South-Eastern Division receiving 83 per cent. of its normal rainfall and the East Gascoyne Division and the Wiluna District about 75 per cent. of its usual April rainfall, but in the Eucla Division the shortage amounted to 67 per cent., and the West Gascoyne region received only a few light scattered falls.

Conditions varied greatly in the Tropics, a considerable rainfall surplus being reported from the East Kimberley Division, and a moderate surplus from the Fortescue Division, while elsewhere the rainfall was below normal, the shortages ranging from 9 per cent. in the DeGrey to 75 per cent. in the West Kimberley Division.

At individual stations the best rains in the Tropics were 478 points at Marble Bar and 297 points at Turkey Creek, while in the sub-tropics the highest totals for the month were 402 points at Albany, 259 points at Eclipse Island, 247 points at Manjimup and 223 points at Davyhurst. In Perth the month's rainfall totalled 108 points as compared with the April normal of 171 points.

The least favourable conditions again prevailed in the West Gascoyne Division, most of which experienced a rainless month, and this dry area extended northwards along the coast to Port Hedland.

Affected by the prevalence of cloud, temperatures were on the whole more equable than is usual in April, but 105 deg. were recorded twice at Port Hedland and once at Winning Pool. A sharp cold wave occurred in the south-western districts on 22nd and 23rd April, the maximum temperature in Perth on 22nd April (65·3 deg.) being the lowest April registration of the kind since 1934, and the following morning's minimum registration (41·4 deg.) being the lowest April minimum registration recorded in the city since 1914. In the country the lowest registrations for the month occurred on 23rd April, when 29 deg. were recorded in the screens at Bridgetown and Wandering, while in the open, temperature receded to 21 deg. at Bridgetown and 27 deg. at Wandering. In Perth the month's mean maximum temperature (77·1 deg.) was 0·9 deg. above normal and the mean minimum temperature (56·5 deg.) was 0·8 deg. below normal.

The following table shows how the mean rainfall in the various divisions as a whole compared with the respective normals for April :—

District.	Mean for April, 1939.	Average Mean for all Aprils.	Percentage above or below average Mean.

South-Eastern	74	89	17 "
North-Eastern	99	132	25 "

May.—Despite a considerable rainfall shortage in the two previous months, seasonal prospects in the south-western divisions of Western Australia are now apparently very favourable as a result of timely and fairly heavy rains in May. A gratifying feature of the month's rains was the extent to which the heavier falls occurred in the north-eastern and eastern wheatbelt, where rain was urgently needed for the benefit of pastures and in order to permit seasonal agricultural operations to proceed.

The best rains of the month occurred early in the second week of May and were produced by a complex type of disturbance which commenced as a slow-moving tropical depression. This low was centred off the North-West coast on 1st May and gradually extended southwards until by 5th May it covered almost the whole State, and it was still centred over the central sub-tropics on 8th May, when its rain productivity was greatly augmented by the arrival of another depression which passed eastwards across the west coast. The combined disturbance produced widespread rains in the sub-tropics and in portion of the south-western tropics, and was accompanied by many thunderstorms and some heavy falls. The rains produced considerable local flooding and some railway washaways and other damage, chiefly in the central and eastern wheatbelt. At the same time an independent disturbance of small size but great intensity caused a remarkable fall of rain at Port Hedland.

The last portion of the month was characterised by fine weather, with mostly cool day temperatures and cold nights, frosts being frequent and fairly severe in the southern inland areas.

In Perth the month's maximum temperatures averaged 0.5 deg. above the normal (68.9 deg.) and the minimum registrations were 0.3 deg. below the normal (52.8 deg.). Extremes of temperature in the city were 81.5 deg. on 25th May and 41.6 deg. on 30th May. Rainfall in Perth in May amounted to 780 points as compared with the normal registration of 509 points.

The following table shows how the month's rainfall in the various districts as a whole compared with the respective normals for May:—

June.—The month's rainfall extended to every part of the State and included unseasonably heavy falls in the Kimberley and DeGrey Divisions, Wyndham, for example, receiving 473 points, and Marble Bar 456 points, as compared with their normal June rainfall of 7 points and 101 points respectively. In the Fortescue Division the rain, though lighter and less unseasonable than the falls in the more northerly tropical divisions, averaged 135 points at all stations.

Further south the Gascoyne Divisions fared only moderately well, the average registration of 143 points in the West Gascoyne being 26 per cent. below normal, while the East Gascoyne stations' average totals were only 6 per cent. more than is usual in June.

The South-Western Divisions experienced a month of heavy rainfall, more particularly the Central Coast and the South Coast, where the average falls amounted to 1,049 points and 714 points respectively. Registrations exceeding 10 inches were, however, concentrated in a belt extending from Jarrahdale to Chidlow's Well, and the highest individual registrations for the month were as follow:—1,417 points at Jarrahdale, 1,295 points at Armadale, 1,279 points at Mundaring, 1,190 points at Kalamunda, 1,135 points at Rockingham, 1,132 points at Chidlow's Well and 1,115 points at Perth. The month's total of 1,115 points at Perth, though 410 points in excess of the June normal, was exceeded in the Junes of the following years:—1934, 1,141 points; 1930, 1,135 points; 1923, 1,280 points; 1900, 1,119 points; 1890, 1,211 points, and 1883, 1,181 points. So heavy is the normal June rainfall on the Central and South Coasts, however, that even this June's average registrations in those districts exceeded the normal by only 54 per cent. and 15 per cent. respectively.

The rainfall lessened rapidly towards the southern agricultural districts, where falls averaged less than three inches, and were only slightly above normal, while a considerable shortage of rain was experienced in the Eastern sub-tropics.

The first marked manifestation of this change consisted of a revival of tropical rainstorm action. Later the southern rainstorm belt began to extend over the southern districts, first in a rapid series of minor surges, which ended with the development of one of the most intense southern depressions which have affected the South-Western districts in recent years. The attendant rainfall was most prolific in coastal sections most exposed to the strong north-westerly winds, considerable flooding resulting on the Moore, Swan and Avon Rivers. In the concluding phases of this storm barometric gradients between Perth and Cape Leeuwin were very steep and produced strong westerly gales. In Perth the wind velocities reached 68 miles an hour on 27th June and 46 miles per hour on the following day. Rough seas prevailed on the sub-tropical coast and high to very high seas were experienced from the vicinity of Perth to beyond Cape Leeuwin. This disturbance was noteworthy also for numerous thunderstorms and some heavy falls of hail.

Following on the departure of the storm exceptionally calm conditions prevailed in Perth, the wind mileage recorded on 29th June being the lowest experienced in Perth since 10th July, 1935.

Temperatures during the month showed few marked departures from average June conditions. In Perth the mean maximum temperature (64·7 deg.) was 0·6 deg. in excess of the normal and the mean minimum temperature (49·1 deg.) was 0·4 deg. below normal.

The following table shows how this month's rainfall in the various divisions as a whole compared with the respective normals :—

No. 54.—Mid-Monthly Employment.

A.—FACTORIES.*

Figures in this table have been computed to a new base and supersede those published in issues previous to March, 1939.

THE ANNUAL MEAN EMPLOYMENT FOR THE YEAR 1928-29 (19,799) HAS BEEN TAKEN AS A BASE = 100.

The index-number fell to 94 for the year 1929-30, and to 69 for 1930-31. The lowest point (60) was reached during the month of August, 1931.

Year.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Annual Mean.
1931	62	60	61	62	63	65
1932	60	63	67	68	66	64	66	66	67	71	72	67
1933	72	73	73	74	70	70	71	73	74	76	78	74
1934	78	79	80	81	80	78	80	82	85	86	87	81
1935	87	88	87	88	88	88	*94	95	97	99	101	93
1936	101	102	104	104	104	103	106	106	106	108	109	105
1937	110	110	110	109	109	108	106	108	109	111	112	110
1938 (a)	111	112	114	113	112	111	107	108	107	110	111	111
1939 (a)	107	109	112	110	110	109

* It should be noted that there is a break in the continuity of the index-number series between June and July, 1935, owing to the inclusion, from July, 1935, onwards, of certain factories previously not included. This tends to exaggerate the degree of recovery.

(a) Indexes after June, 1938, are based on sample returns and are subject to revision.

B.—RETAIL ESTABLISHMENTS.

Index numbers, showing the Trend of Retail Employment, compiled from returns specially collected from 69 representative establishments.

(Base: July, 1933 = 100.)

Year.	Jan.	Feb.	Mar.	April.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.	Annual Mean.
